MIS PEDICLE SCREW SYSTEM

## Features & Benefits

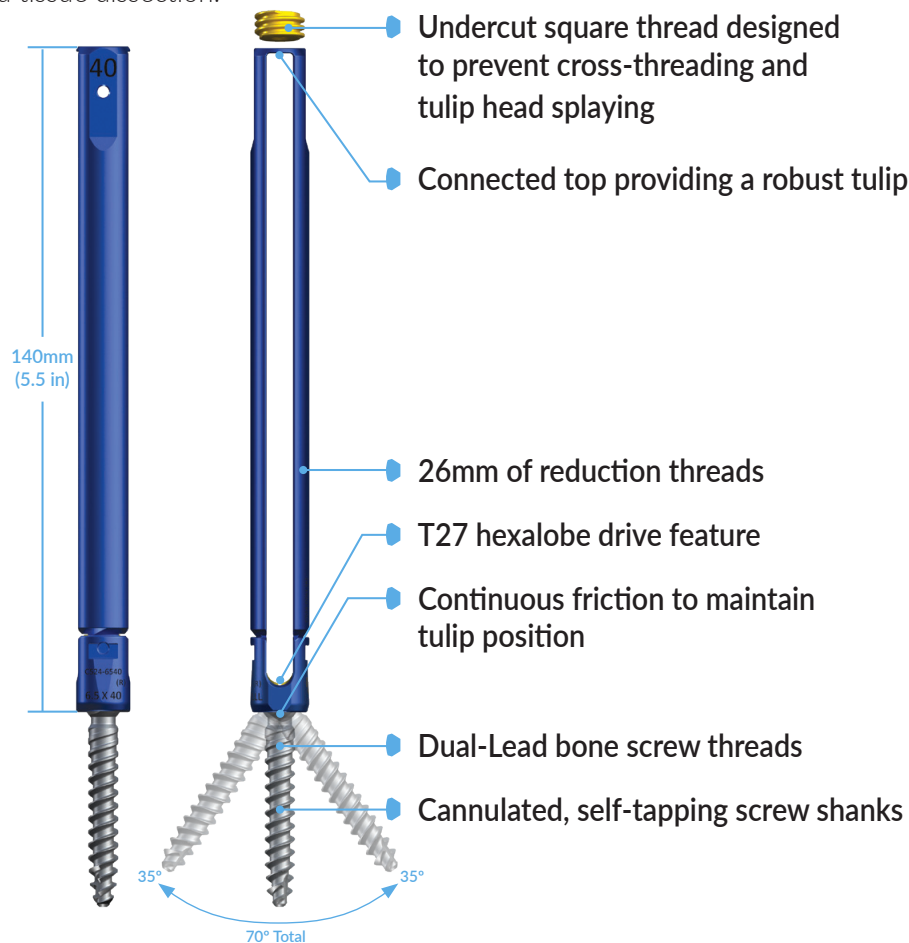

CURITEVA<sup>®</sup>

# PRODIGY<sup>®</sup> MIS Pedicle Screw System

The Prodigy MIS Pedicle Screw System is designed to minimize the complexity of procedural steps while correcting and stabilizing the posterior thoracolumbar spine through a percutaneous approach. The system is composed of pedicle screws in standard and dual-thread cortico-cancellous options, ranging from 5.5mm to 7.5mm in diameter in 30 -55mm lengths. The Prodigy MIS system provides reliable rod delivery and significant rod reduction capability while minimizing the incision size and tissue dissection.

## MIS Polyaxial Screw

- Color coded tulip heads by bone screw diameter
- Easy tab removal leaving a low profile and clean break
- Simple and efficient instruments provide advanced manipulation techniques
